

Weather Resistant

The product of Vinmex is highly weather resistant quality is achieved by anti ultra violet and high impact resistant formulation. It withstands long exposure in extreme weather, like under scorching sun, storms, dryness or high humidity. They are ideal to install in special conditions like in coastal areas where the strong winds, heavy rains and salty air effects the building. Vinmex Upvc is more applicable with no quality deterioration ever. They do not rot, nor warp, it can perfectly withstand years of weather beating.

Fire Resistant

Vinmex Upvc products are fire retardant. Fire tests have shown that Upvc material being naturally flame retardant through their product life, will not cause support or enhance the natural development of fire. Unlike the timber windows, Upvc sections do not support combustion are in fact self extinguishing.

Economical & Maintenance Free

Vinmex Upvc products are very economical when compared to the other alternatives like wood, aluminum, steel, etc. available in the market. Also it is very easy and quick to fabricate & install without any massive labour work. Looking upon other advantages like closed, smooth surface makes it extremely easy to clean, using any household detergent in water. This also means that the product is virtually dirt resistant because there are no pores which can be filled with dirt. They do not require regular repainting or expensive maintenance and also these products are also Termite Resistant.

Water Resistant

Vinmex Upvc doors & windows are water resistant. They are fabricated by using sophisticated and automatic machines insuring no gaps. During installation process special material are used to prevent water passing from outside to inside. These Upvc window and doors systems are successfully used in swimming pools, marine & ocean environment without detriment to the surface finish or performance. These Upvc windows and doors are ideal for monsoon seasons.

Efficient Thermal Insulation

Vinmex Upvc doors & windows contribute to a cozy and comfortable atmosphere in your home. They prevent thermal bridging, the thermal insulating performance of the finished window is exceptionally good. The glazing is also of utmost importance for good thermal values, also contributing to a substantial energy saving. Vinmex Upvc eliminate the problems of water condensation on he window planes inside the house.

Sound / Acoustic Insulation

Vinmex Upvc products are sound retardant. These products are ideal for offices, schools, hospitals, buildings, etc where people need silence. these Upvc windows & doors are consist of a multi-chambered profile with tight seal, making them the best windows in noise separation. It cuts unnecessary disturbances.

Environment Friendly

The extrusive process of Vinmex Upvc window and door profiles is relatively energy efficient, compared to other materials. Another benefit where Upvc has been specified as an alternative to wood is that it helps in curbing deforestation. Besides they can be fully recycled and reused for the production of Upvc profiles.

Energy Efficient

In air-conditioned building & houses windows with a low conductive material can reduce the loss of energy. Vinmex Upvc products has been designed with multi chambers which reduce the transfer of heat & can reduce the energy loss by over 30-35%. Thus making it ENERGY SAVING WINDOW.
